

LÓGICO AQUA

Easy water

What is Lógico Aqua?

Nutritionists recommend drinking 2 litres of water per person per day. Maintaining a good hydration improves our physical condition and prevents disease.

A good hydration is important specially for children and elderly people. Good-tasting water, such as that provided by **Lógico Aqua**, makes it easier for us to achieve this objective.

Over the last few years, the growing interest in sporting activities is increasing water consumption in our society.

With **Lógico Aqua** you can always prepare your favourite isotonic drinks and healthy smoothies with filtered water, without unpleasant odours and flavours.

Ideal water for drinking and cooking

It is very important to cook with water without unpleasant odours and flavours. Evaporation during cooking concentrates impurities, thus making us consume these impurities in greater proportion than when we only drink water.

Lógico Aqua is a good way to save on the family budget. Drinking and cooking with filtered water is very cheap. One single filter of the **Lógico Aqua 12 model** produces 6,000 L of filtered water.

Filtered water for everyone

Lógico Aqua is the best system to enjoy filtered water in both quantity and quality.

The **Lógico Aqua** system series has different models available, which adapt easily to the characteristics of your family and your kitchen.

With a simple and easy installation you will have all the filtered water that your family needs to drink and cook.

Which model to choose?

Direct Pack. Filtered water directly on your kitchen tap.

The simplest and most economical **Lógico Aqua** system. Very easy to install: just install the filter between the cold water outlet and your tap.

1-way Pack. Filtered water through a 1-way tap.

With the **1-way Pack**, filtered water is supplied to a specially designed tap..

3-way Pack. Filtered water on a 3-way tap.

The **3-way Pack** is the ideal system for you and your family. One single tap supplies cold, hot and filtered water with a modern and rugged design.

Lógico Aqua has been developed to meet the needs of the modern family. It allows you to easily have filtered water in your kitchen, ideal for drinking and cooking.

Use your current tap or install one of the two design tap models we offer you.

Choose from our three systems. You can install them yourself or entrust it to an approved installer provided by your point of sale.

You can contact our Customer Service by calling **+34 93 693 43 09** or sending an e-mail to **logicoaqua@logicoaqua.com**

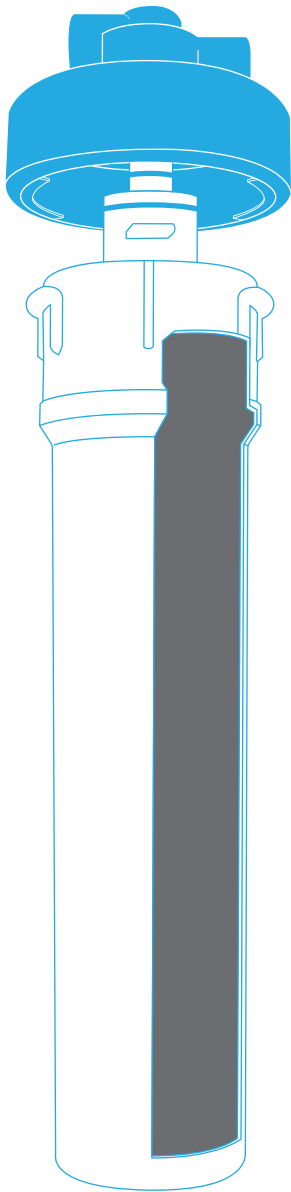

Changing the filter is really easy. Just follow the instructions on the user's manual. The replacement period depends on the family consumption.

Service guarantee. Spare filters are available throughout the country. You can consult the Customer Service by sending an e-mail to **logicoaqua@logicoaqua.com** or calling Tel. **+34 93 693 43 09**

Product certified by UNE 149101 for Water Treatment Equipment Inside Buildings. Complies with all applicable laws and the requirements of Royal Decree 140/2003 and Royal Decree 742/2013.

Filter head made of reinforced **ABS** plastic.

Microparticles filter capable of retaining impurities up to 15 μ .

Activated carbon block made of high quality coconut shell.

Removes all chlorine compounds and organic elements that cause unpleasant odours and flavours.

High-technology water filtration for your home.

The Lógico Aqua filtering system is very effective, since it filters water through a solid surface of high quality activated carbon.

This is a far more effective system than traditional granulated carbon filters..
